SUMMARY

A recent Information Technology Engineering graduate with practical experience in building web and mobile applications through academic and personal projects. I am skilled in problem analysis and designing software solutions. My project work includes developing an AI-powered system and an e-commerce application. As a fast learner with strong teamwork skills, I am seeking an opportunity to contribute to a professional development environment and grow my technical abilities.

EDUCATION

Taiz University
Bachelor of Science
in Information Technology Engineering

Taiz, Yemen
Aug 2025

EXPERIENCE

AI-Powered Road Defect Detection System *(Graduation Project)*

Final Year Project, Taiz University

- Developed a system using artificial intelligence and computer vision to automatically identify and locate road defects from images
- Contributed to building the back-end infrastructure for data processing, storage, and management
- Collaborated effectively within a team environment, applying modern software development lifecycle practices

E-commerce Application *(Web & Mobile)*

Personal Project

- Developed an e-commerce solution featuring a cross-platform mobile application for users and a web-based back-end for management.
- Built a secure RESTful API to connect the front-end and back-end, handling user data, products, and orders.
- Designed and implemented the relational database to ensure system efficiency and data integrity

Web Application for a Car Showroom

Personal Project

- Created a dynamic web platform for a car dealership, featuring a public gallery for vehicle browsing and a secure administrative panel for inventory management.

SKILLS

Technical Skills

- **Application Development:** Flutter for cross-platform applications
- **Web Development:** Web application development, Laravel, PHP, JavaScript, HTML/CSS
- **Programming Languages:** Python, C++, Java, Dart
- **Databases:** Relational Database Design & Management (MySQL, SQL Server)
- **Artificial Intelligence:** Foundational knowledge of Computer Vision and AI model implementation.
- **Core Concepts:** Object-Oriented Programming (OOP), MVC Architecture, API Development, Version Control (Git)

Personal Skills

- Communication Skills
- Teamwork
- Problem-Solving
- Critical Thinking
- Ability to work under pressure
- Fast Learner

LANGUAGES

- **Arabic:** Native
- **English:** Intermediate
